1. Cr 1 October 1952, the headquarters and the signal unit returned to the Flieger-horst mass no in Goerries, southwest of Schwerin ( N 54/T 46). (C-3) On 7 October	25X1 1
5X1  Ouring the period from 8 to 14 October, troops returned to the two installations southeast and northwest of the Berliner Strasse. Source observed 65 T-31/85 tanks, 10 JS-2 tanks and 26 JSU-122 guns. The installation southeast of Berliner Strasse was vacated by VP at the same time. On 19 October, the two installations were useful by troops.2	
Comment. The Headquarters and unidentified signal battalion of the IX Mtz Lifle Corps as well as other units of the corps probably returned from the fall maneuvers of the Third Shock Army on 1 October 1952. Units of the unidentified engineer battalion of the corps were dispatched on two trains from the Bittkau training grounds to Schwerin on 6 and 10 October.	25X1
X1 The information in the present report probably concerns the train which left Bittkau on 6 October.	
Comment. These units of the 25th Tank Div returned from field exercises of the Fourth Gds Mecz Army from the area south and east of Rathenov. Records on transportation indicate that 10 trains went from that area to Prenzlau during	
returned to their previous quarters namely the former to the barracks installation southeast of Berliner Strasse and the latter to the barracks installation north-vest of Berliner Strasse. The unidentified mortar regiment of the afore mentioned division probably was observed moving through deustrelitz, presumably en route	25X1
to Prenzlau on 9 October. This regiment is therefore vaguely believed to be at its previous installation southeast of Berliner Strasse. No information is available that the installation southeast of Berliner Strasse was vacated by VP * the processing station for tank vehicles of the VP.	•
